Programs and Services

An Autodesk Authorized Systems Center serving the AEC community, Microsol Resources enjoys a reputation for delivering outstanding service to its clients. By focusing our curriculum on only those products we sell and support, we bring the same commitment to excellence to our academic programs that our clients have known for years.

Training Center

Convenient Location: Located near Penn. Station with nearby stops on the Path and 1, 9, A, C and E Subway lines, we are easily accessible, no matter where you are located. If you are driving, you will find parking directly across the street from our facilities.

State of the Art Facilities: Our classrooms contain state of the art hardware and the latest software. We provide you with everything you need to have a focused and productive learning experience.

Experienced Instructors: All of our instructors are experienced, seasoned professionals. They must have practical office and CAD experience in an AEC firm and have prior teaching experience before joining our staff. This is essential if we are to maintain our standards and is critical to our students' ability to learn.

Small Class Size: No more than ten people are seated in a single class ensuring individualized attention.

Interactive Training: A critical aspect of all learning is exposure. We believe that the only way to effectively learn software is with a hands-on approach. All of our classes are hands-on with one computer to a student.

Focused Curriculum: Our curriculum focuses on giving our students the tools they need to perform their job. Drawing on our expertise in serving the AEC community, our courses are designed for high retention. All of our courses use carefully constructed data sets that mimic the real world application of the software. This ensures that students will be immediately productive in the application of the software to their work. Combined with continual emphasis on the adoption of the best industry practices, each student leaves our class ready to become a more productive member of their office.

On-Site Training

All of our courses may be held at your facility. We will provide instructors, all courseware, and data sets. We do, however, ask that you are able to provide each student with access to a computer. For information about the hardware and software requirements for each course, please give us a call.

One-to-one Personalized Training

We will provide instruction by the hour, at your facility or ours. Training can be tailored to address any audience and any subject matter.

Custom Courses

If you don't see a course description that matches your needs, please give us a call. We are developing new courses all the time. In addition, for a fee, we will tailor a course to address your specific requirements.

Schedule

Monthly Classes: All classes in our regular curriculum are offered on a monthly or bi-monthly basis. Please call for the date and time of the next regularly scheduled class.

Flexible Scheduling: If you have a date or time conflict, we are always happy to adjust our schedule to meet your requirements. Also, based upon demand, additional sessions may be added. All day classes may also be taught as either morning or afternoon sessions. Please let us know what will work best for you and we will do our very best to accommodate your needs.

Pricing

Competitive Pricing: Your business is very important to us. We will honor any written quotation from our competitors. Quotations can only be applied to like courses of the same duration and quotations that include volume discounts can only be applied to groups of the same size.

Closed Course Discounts: With four or more students from one company or organization enrolled in any single class, we will close that class to that group. In addition, the fifth through tenth members of such groups will be enrolled at a fifty percent discount. In addition to providing you with significant savings, this enables us to direct the instruction toward your specific needs.

Group Discounts: We offer significant discounts for group enrollment. Whether you need to train one department or a whole firm, we have special pricing plans available for you. Please call for more information.

AIA and NY State Registered Provider

Microsol Resources is registered with the AIA Continuing Education system (AIA/CES) and is committed to developing quality learning activities in accordance with the AIA/CES criteria.

Our courses are also accredited with the New York State Department of Education for Continuing Education credits.
